**Re: SparkEd Seminar Workshop on Next Generation Blended Learning**

---

De La Salle Santiago Zobel School (DLSZ) is organizing another **SparkEd Seminar-Workshop on Next Generation Blended Learning** with the theme “Sparking Creativity Thru Technology”. This will be held at the DLSZ-Alabang Campus on October 25 and 26, 2018.

The target participants of the seminar workshop are the following:

1. Principal;
2. Computer Technology or Education Technology Coordinator;
3. Teachers and Academic Personnel; and
4. Information Communication Technology Head.

**Sparked 2018** will be focusing on how technology can bring out the creativity of both the teachers and the students in order to make their learning environments more active, collaborative, constructive, authentic and goal-directed. It will highlight how blended learning can be integrated not only in academic subjects but also in other subjects like Music, PE, Arts, Technology and Livelihood Education.

The seminar-workshop as it offers two sessions: **Basic Session** for first-time attendees where participants are to create sample drafts of implementing Blended Learning models in their subject areas; and **Advanced Session** for previous attendees who will be making sample assessment tools using some apps, research outlines and sample designs using these apps during their respective break-out sessions.

To cover the expenses for meals (exclusive of breakfast and dinner) and conference materials during those two days, the conference fee is Php3,000.00 per participant for early bird registrants; Php4,000.00 for regular participants (registered from October 6 to October 24, 2018); and Php4,500.00 for walk-in participants.
