Teachers as Lifelong Learners

How

Learning on the go

What

**A culture of professional
learning in a school**

Why **growth mindset** matters?

Growth mindset allows teachers to have the **courage to take risks** and explore new approaches-aiming for the desired goal **without losing confidence when mistakes or challenges present themselves.**

Growth mindset requires:

- recognition of teacher individuality
 - acknowledgement of YET...
- the attitude of “AND... not BUT”...
 - support from school leaders.

Innovative success in teaching does not happen overnight. It's how the school community builds a **culture of lifelong and professional** in order for teachers to face and thrive amidst changes.

explorative: "What if...Why not..."
 growth mindset: "It's ok to commit mistakes."
 grit and perseverance: "I will not give up."

Ultimate goal: Better Teachers, Better Learners
