

## Philippine Education Research Journal Review Guidelines for Refereed Articles

### General

- |                 |   |
|-----------------|---|
| 1. Relevance    | Does the manuscript focus on Philippine education?  |
| 2. Validity     | Does the manuscript describe a study that uses appropriate methods and analyses and has conclusions supported by the results? |
| 3. Originality  | Does the manuscript describe a study that does not duplicate existing research?   |
| 4. Ethicality   | Does the manuscript show no signs of research misconduct?   |
| 5. Clarity      | Does the manuscript use clear, concise, and accurate language?  |
| 6. Significance | Does the manuscript make a worthy contribution to the existing body of knowledge?   |
| 7. Format       | Does the manuscript follow the author guidelines?   |

### Specific

1. Is the study design described sufficiently?
2. Are inclusion and exclusion criteria explained?
3. Are the subjects representative of the target population?
4. Are control subjects appropriate?
5. Is information included to justify the sample size used?
6. Is the statistical power or the significance level of the tests declared?
7. Was blinding of investigators done (if possible)?
8. Was blinding of subjects done (if possible)?
9. Is appropriate statistical analysis used?
10. Is attrition of subjects addressed adequately?
11. Are results recorded appropriately?
12. Are confounders accounted for in the analysis and design?
13. Do the analyses support the conclusions?

### Additional

1. What are the manuscript's strengths?
2. What are the manuscript's areas for improvement?
3. What comments do you have for the editorial board? (These will not be shown to the authors.)
4. What is your recommendation? ☐ Accept ☐ Return for revision ☐ Decline
