2022 PEAC STANDARDS-BASED QUALITY ASSESSMENT INSTRUMENT FOR THE QUALITY ASSURANCE OF PRIVATE ELEMENTARY SCHOOLS (SQAI-ES)

Background and Rationale

In general, the 2022 Private Education Assistance Committee or PEAC Standards-based Quality Assurance Instrument for Elementary Schools or SQAIES aims to provide school heads and concerned administrators of private elementary schools a tool that will enable them to systematically and comprehensively self-assess their performance in the various programs and services they provide.

What does the instrument contain? First, this instrument consists of indicators of quality school practices that are specific to the elementary level. These are concrete and observable indicators. that indicate alignment with and accomplishment of requirements and standards set by the Department of Education for the K to 12 elementary school program.

Second, this instrument incorporates selected standards of compliance from the 2018 Certification Assessment Instrument (CAI) used by PEAC for the certification of Junior High Schools participating in the DepEd's Education Service Contracting (ESC) program. These items have been included in response to concerns raised by administrators of Junior High Schools with an Elementary department regarding the consistency and continuity of quality and standards-based practices in both departments. Although private elementary schools do not as of this writing participate in the ESC program and do not undergo certification to qualify for government subsidy, private elementary schools stand to benefit from looking at items in areas that apply to both elementary and secondary levels (e.g. academic support and school budget and finances).

Third, in the light of disruptions to school life such as the pandemic, the instrument presents quality indicators regarding school readiness and recovery and continuity of learning. These indicators are also drawn from DepEd's various Orders (DO 12, s. 2020) and Memos on the adoption of a learning continuity plan and delivering instruction in different modalities (DO 32, s. 2020). The indicators are also based on the PEAC Recovery and Readiness Plan which the DepEd has accepted as a learning continuity plan for PEAC's ESC participating schools.

Since as of this writing private elementary schools do not qualify for government subsidy via a certification process, the SQAIES is not in its present form a certification instrument. Private elementary school administrators though can use the SQAIES for self-assessment and quality assurance purposes. With these quality indicators, private elementary school administrators can examine the design of their curriculum and instruction, supervise the faculty and staff in academic support units, monitor their work, and assess learning outcomes. As a result, school administrators can determine their school's strengths and identify areas for continuous improvement. School administrators can also coordinate their policies, programs and plans with the Junior High School to facilitate and ensure a seamless flow in the delivery of educational services.

Definition of Quality Assurance

In concept, quality assurance can mean many things to different organizations or institutions. For this instrument, quality assurance is defined as "any systematic process of determining whether a product or service meets specified requirements"¹. In the school context, requirements are expressed in the form of standards and so quality assurance involves finding out how the school meets standards. In the SQAIES, the standards that serve as the norm for the school's performance are drawn from different documents that focus on the effective conduct of private elementary schools. Among these documents are various DepEd Orders and Memos, the 2016 DepEd Curriculum Guide and the 2020 Most Essential Learning Competencies (MELC) Guide, and the 2010 Revised Manual of Regulation for Private Schools.

Quality Assurance Framework: The Rules-based Approach

In a study of quality assurance approaches, Lindsay H. Heywood identifies two dominant approaches to quality assurance namely the principles and rules-based frameworks. The table below summarizes the differences between the two:

Characteristics	Principles-Based	Rules-Based
View of Quality System	Integrated & Systemic	Standalone & Ad-hoc
Focus	Improvement	Compliance
Feedback	Formative	Summative
Improvement Objective	Continuous & Contextualisation	Static & Standardisation
Reference	Framework & Non-Prescriptive	Standards & Prescriptive
Assessors	Skilled Peers	Technical Experts
Assessment Climate	Mutual Respect & Trust	Fearful and Suspicious
Motivation for Assessment	Intrinsic	Extrinsic
Methodology	Assessment or Evaluation	Audit

Of these two, the rule-based approach is evident in the current implementation of the Junior High School certification process. During certification, Junior High Schools report on their compliance with requirements and obtain feedback and validation on their report from an external team of trained certifiers. A similar approach is recommended for adoption for the quality assurance of private elementary schools. For one, the rule-based approach provides private elementary school

¹Rouse, M. Quality assurance. <u>https://searchsoftwarequality.techtarget.com/definition/quality-assurance</u>

administrators with the baseline information on minimum requirements for program delivery. Second, two-level schools with both elementary and secondary levels and are already participating in the Junior HS Certification program benefit from a single quality assurance approach applied to both levels. This establishes a sense of continuity of operations across levels and consistency in the implementation and evaluation of standards. The rule-based approach is also useful for standard alone elementary schools as this perspective also makes it clear to the schools the minimum requirements for their compliance.

Following the rule-based approach, private elementary schools are encouraged to do their quality assurance on their own as part of their institution's standard operating procedures. Aside from this internal exercise, schools may also undergo an external form of quality assurance where the school is visited by an external team of validators or evaluators. The Junior High School certification process is an example of an external form of quality assurance. In the event that certification is available for private elementary schools, the certification may parallel that of the Junior HS system and may be diagrammed as follows:

At the center of the diagram is the emphasis of obtaining evidence of the school's compliance with the K12 standards. Around this center are the participants in the certification process and their respective tasks. Schools applying for certification or re-certification prepare a report of their self-assessment of compliance with the standards in each area of the Certification Assessment Instrument or CAI. The report is accompanied by exhibits of the school's evidence for accomplishing standards in different areas. There are nine (9) areas as identified in the outermost rectangle namely, (1) School Philosophy, Vision, Mission, Goals and Objectives; (2) Curriculum, Assessment and Instruction; (3) Instructional Leadership; (4) Faculty; (5) Academic Support and

Development Services; (6) Physical Plant and Instructional Support Facilities; (7) Administration and Governance; (8) School Budget and Finance; and (9) Institutional Planning and Development.

An external team of validators such as a group of trained PEAC certifiers then reads and validates the school's self-assessment report in advance. The team visits the school at an announced time and goes over the different exhibits. The team also interviews different school personnel and pops in various classes and observes the teaching-learning process. The team gives their feedback regarding their self-assessment report and recommends areas for improvement and level of certification. Following the rule-based approach for quality assurance, a certified ESC school therefore is one which has complied with all DepEd and K12 program standards and adheres to applicable DepEd policies.

Dimensions of the Quality Assessment Instrument

Quality assurance involves the use of quality assessment instruments which list quality indicators. The development of the quality indicators in SQAI-ES is premised on five dimensions that recur in various documents on quality private elementary education aligned with K12 program standards and requirements. Private elementary schools demonstrate quality when these five dimensions are observable in different school areas; that is, the school's policies, programs and services are vision/mission-oriented, standards-aligned, developmentally appropriate, outcomes-driven and evidence-based. What do each of these dimensions mean?

¹ This is a revised version of an initial section of the proposed PEAC Standards-based Quality Assurance Instrument – Elementary Schools or SQAI-ES. The dimensions have been adapted for inclusion in the PEAC SQAI-ES, JHS CAI, and SHS CAI. While the number of school areas may vary (SQAI-ES and JHS CAI have nine while SHS CAI has 10), the five dimensions are applicable to all levels in basic education.

<u>Vision/Mission-Oriented</u>: As part of their identity as an educational institution, private elementary schools articulate and carry out their own vision and mission, philosophy of education, goals and objectives. The school's vision and mission statements define the school's purpose and direction. Private elementary schools achieve quality when the school is able to operationalize the vision and mission in the different aspects of school work. The SQAIES quality indicators then determine how the different policies, programs and services in the nine school areas are oriented to realizing the vision and mission-oriented are the different school areas in their policies, programs and services? To what extent is the school's vision-mission accomplished in the nine school areas?

<u>Standards-Aligned</u>: With the passage of RA10533 or the 2013 Enhanced Basic Education Act, all basic education schools are mandated to teach the Department of Education's K to 12 curriculum program. The program contains curriculum standards and competencies for pupils to learn. As a private entity, elementary schools are also enjoined to comply with the provisions of the 2010 Revised Manual of Regulation for Private Schools. Private elementary schools thus show quality when these standards are adopted, implemented and used for evaluation in the nine school areas. For these reasons, the SQAIES quality indicators examine how the school's curriculum, instruction and assessment are aligned with and utilize these standards. With this second dimension, the SQAIES raises the question: To what extent is the school implementing the K12 program standards and other requirements in the nine school areas?

Developmentally Appropriate: Children in the elementary school level develop and realize their potentials when the school provides them research-based teaching and learning experiences that attend to their developmental needs and nurture their growth in different domains (i.e., physical and motor, social-emotional, character and values, cognitive and intellectual, language, mathematical and creative-aesthetic). Consequently, private elementary schools manifest quality when the policies, programs and services in the nine school areas are formulated, undertaken and assessed in accordance with the child's developmental requirements and milestones. Hence, the SQAIES quality indicators gauge how the school incorporates the pupils' background, needs, learning styles and abilities when planning, implementing and evaluating policies, programs and services. In this third dimension, the SQAIES focuses on the following question: To what extent are the different developmental needs of pupils addressed in the nine school areas?

<u>Outcomes-driven</u>: Schools are outcomes-driven when they focus on results that represent pupils' performance of expected skills as well as each department or program's achievement of stated goals. Private elementary schools rate high on quality when first, their pupils in various assessments reliably and consistently demonstrate the skills required at a certain grade level or higher and second, when their programs and services accomplish their specific targets. In line with this, the SQAIES quality indicators measure and report pupils' achievement levels and program results. With this dimension, the SQAIES examines the following: To what extent are pupils able to demonstrate knowledge, understanding and performance of learning standards and

competencies? To what extent are the pupils able to accomplish the milestones in the different domains of development? To what extent are programs and services in the nine school areas able to produce desired results?

<u>Evidence-based</u>. Successful elementary schools regularly obtain data and employ various metrics to present and showcase their pupils' achievement and effectiveness of their programs and services. They also search for and document valid and authentic examples of pupils' achievement, learning interventions and program results. Private elementary schools undertake these tasks with transparency and rigor. With this dimension, the SQAIES quality indicators check on the following: To what extent is the school able to support its claims of pupils' achievements and program effectiveness in the nine school areas?

These five dimensions are integrated throughout the instrument. Every SQAI-ES area has items that reflect these dimensions. For example, in the area of Instructional Leadership, item 1 (The provision of a system that actively communicates to various stakeholders the school's Vision, Mission, and Kto12 standards and directions and school's development and innovations in curriculum, assessment and instruction) is vision-mission oriented. Item 2 (The utilization of a system for monitoring and evaluating the extent of alignment of school operations with the school's philosophy, vision-mission, goals and objectives and accomplishment of curriculum standards) is about being standards-aligned whereas Item 3 (A program for enabling teachers to contextualize the pupils' learning according to their stage of development, cultural background and mother tongue in order to make the curriculum relevant to their experiences) refers to the developmentally appropriate dimension. The different parts of Item 6 (Regular collection, interpretation and dissemination of data and evidences to top school leaders and key stakeholders on the following for informed decision-making: pupils' achievement of learning standards and performance of competencies) cover the outcomes-driven and evidence-based dimensions. Through the integration of these five dimensions, school administrators can understand the basis for specification of quality indicators.

Instrument Areas

This instrument covers nine areas of school operations that produce quality student performance and organizational effectiveness. These areas are:

- A. School Philosophy, Vision, Mission, Goals and Objectives
- B. Curriculum, Assessment and Instruction
- C. Instructional Leadership
- D. Faculty
- E. Academic Support and Student Development Services
- F. Physical Plant and Instructional Support Facilities
- G. Administration and Governance

H. School Budget and Finances

I. Institutional Planning and Development

The above areas are clustered into two groups – Core and Support. The Core group of areas covers sections deemed essential to teaching and learning. These areas are School Philosophy, Vision, Mission, Goals and Objectives; Curriculum, Assessment and Instruction; Instructional Leadership; Faculty; and Administration and Governance. The Support group of areas includes school operations that are undertaken in the context of and based on the direction of the Core group of areas. These areas are Academic Support and Student Development Services; Physical Plant and Instructional Support Facilities; School Budget and Finance; and Planning and Development. Observation of Classroom Instruction is a significant aspect in the area of Curriculum, Assessment and Instruction.

Each area consists of a set of quality indicators combined with selected PEAC CAI standards for compliance. Items from the PEAC CAI are marked with a plus (+) sign. In the Core group of areas, certain items regarded as power indicators/standards are marked with an asterisk (*). These indicators/standards are critical to the effectiveness of a particular area as these illustrate its key characteristics. Other items that are not marked are regarded as support indicators/standards which contribute to or supplement the achievement of a power indicator/standard. These items are done in relation to the direction of the power indicator/standards.

Format of the Survey Instrument and the Rating Process

Each Area is introduced by an explanatory paragraph presenting the basis of evaluation. The Area lists quality indicators standards for compliance. A list of Examples of Sources of Evidences is given for the school's guidance during its self-assessment and preparation of exhibits and documents. With the exception of the area on "School Philosophy, Goals and Objectives", standards in each area are accompanied by a rating scale. Again, since there is no certification mechanism at work in the elementary level, the descriptions in the rating scale below pertain at this time to quality indicators. In the event of the activation of certification at the elementary level, these quality indicators will be referred to as standards of compliance. This explains why the descriptions state "quality indicator/standard of compliance".

Rating	Description
	School practice of the quality indicator/standard of compliance is
4	extensive and innovatively done. The evidence of extensive and
	innovative practice is documented in multiple and creative ways
	School practice of the quality indicator/standard of compliance is
3	regularly done. The evidence of regular practice is documented in
	multiple ways.

2	School practice of the quality indicator/standard of compliance is partially done. The evidence of partial practice is limited in available
	documents.
	There is no school practice of the quality indicator/standard of
1	compliance. However, there are plans to do the quality indicator/standard
	of compliance.
0	There is no school practice of the quality indicator/standard of
0	compliance .

Based on the evidences presented, individual indicators/standards are rated. Upon completion of the individual indicator/standard rating, the area rating is determined and recorded according to a decision rule that examines the school's level of performance. Details of the decision rule are found in Appendix A. A Comments Section is provided for observations and other remarks.

Use of the Instrument

As earlier stated, this instrument is used for self-assessment purposes by any private elementary school for its quality assurance program. Prior to the use of the instrument, a general orientation may be undertaken on the purpose and contents of the instrument. The school may then organize teams that will assess their assigned areas. When going through each area items, teams need to search for evidences of the quality indicator and do the corresponding rating. The mode is determined to show the trend of the school's performance. Teams are encouraged to make meaning of the pattern in the results and write their realizations in the comments section found at the end of each area. These realizations may also include explanations or causes for certain results. Teams may then recommend to the school specific actions that address the results.

A. PHILOSOPHY, VISION, MISSION, GOALS AND OBJECTIVES

Description

The school philosophy vision, mission, goals and objectives present the overall direction of the school's educational work. The statements clearly describe the school's fundamental educational purposes, and the essence of what as a community of learners it is seeking to achieve as a community of learners. These serve as the basis for daily operational and instructional decision making as well as long-range planning.

Basis of Evaluation

The school philosophy, vision, mission, goals and objectives are evident in the school in various ways. The statements are used to determine the extent to which policies, practices, resources, and curricular and other program components work together conceptually, structurally, and operationally to achieve stated expectations for teaching and learning. There is a regular system of communicating and disseminating the contents of the school philosophy, vision, mission, goals, and objectives to the different sectors and stakeholders of the school community. Through this system, all the members and stakeholders of the school community are able to articulate a common understanding of and commitment to institutional goals, curriculum priorities, learning approaches, assessment procedures, and accountability as well as accept responsibility for the students' attainment of the curriculum standards. This PVMGO is also aligned with the community it serves and is reviewed periodically by stakeholder representatives.

B. CURRICULUM, INSTRUCTION, ASSESSMENT

Description

The quality of instruction in a school is the most important factor affecting the quality of student learning, the achievement of expectations for student learning, the delivery of the curriculum, and the assessment of student progress. The school's instructional program is grounded in the school's mission and expectations for student learning, supported by researches on best practices, and refined and improved based on identified student needs.

With the passage of the Enhanced Basic Education Act of 2013, the Department of Education mandates that schools first, work towards the holistic development of the Filipino child with 21st century skills to enable him or her to be locally and globally competitive; and second, implement and teach the Kto12 standards-based curriculum.

Basis of Evaluation

The elementary school designs, implements and assesses a curriculum that is aligned with national curriculum program, its philosophy of education and principles of childhood development and responsive to the needs of its community and various stakeholders.

The elementary school designs, implements and assesses a system of instruction that is aligned with the national elementary curriculum program, its philosophy of education and principles of childhood development and responsive to the needs of its various stakeholders.

The elementary school designs, implements and assesses its system of evaluation of student learning that is aligned with national curriculum program, its philosophy of education and principles of childhood development and responsive to the needs of its community and various stakeholders.

C. INSTRUCTIONAL LEADERSHIP

Description

As the designated leader of the school, the principal works to ensure that the learning goals of the Kto12 standards-based curriculum are achieved. As discussed in DO 24 s.2020 National Adoption and Implementation of the Philippine Professional Standards for School Heads, the principal is primarily an instructional leader who continuously seeks ways to improve the school's teaching-learning processes and environments and improve student performance.

Basis of Evaluation

The principal effectively functions as an instructional leader in a number of significant activities. The principal communicates to all sectors and stakeholders the directions of the school's Vision and Mission and the desired learning outcomes of the Kto12 standards-based curriculum program. The principal designs and implements a system for aligning the different school operations and departments with the school Vision and Mission and the learning outcomes of the Kto12 standards-based curriculum program. The principal initiates changes in instructional and assessment practices to make learning more relevant, meaningful and evident for all students. The principal actively monitors and provides feedback to different sectors on their implementation of and contributions to the accomplishment of the Kto12 curriculum goals. The principal supports the professional growth of the faculty and staff and encourages them to adopt a growth mindset and become lifelong learners in the understanding and practice of relevant 21st century pedagogies. The principal provides time for teachers to collaborate on analyzing data on student performance and planning interventions for higher student achievement. The principal also manages the school's resources and funds to provide the needed instructional facilities and materials for successful teaching.

D. FACULTY

Description

The school recruits, hires and maintains faculty who are licensed, qualified, competent, and sufficient in number to effectively enable the school and the specific educational programs offered to accomplish their purposes. Faculty assignments are such that faculty members are able to carry out their duties effectively. Faculty members have adequate time to prepare and provide effective instruction, advice and evaluate students, continue professional growth, and participate in service activities expected by the school. The student-faculty ratio is consistent with the size, scope, goals, and the specific purposes and requirements of the programs offered. All faculty members are able to guide student learning and to communicate personal knowledge and experience effectively.

Basis of Evaluation

Feedback on the faculty's performance is given in different ways. The school regularly conducts annual faculty performance appraisals and clinical supervision to help faculty assess themselves and improve on their performance. The school also offers varied professional development opportunities to upgrade the faculty's competence and deepen their understanding of their particular functions. The design of the professional development program is guided by the school's philosophy/mission and aligned with the 2017 Philippine Professional Standards for Teachers.

E. ACADEMIC SUPPORT AND STUDENT DEVELOPMENT SERVICES

Description

Academic Support Services and Student Development services work together to accomplish the school's curriculum goals and assist in its evaluation and enhancement. These service units as measures of quality facilitate the effective delivery of classroom instruction: Registrar's Office, Library-IMC, and Laboratories. The admission policy should be consistent with the PVMGO of the school and its effectiveness is in its predictive ability of the learner's academic potentials. Basis of Evaluation

Recording of Learner admission, progress and achievement and preparations of transcripts of records, certificates and diplomas and organization of learner's academic data are done in the Registrar's Office. Adequacy, accessibility and confidentiality of these data are measures of quality.

The Library-Instructional Media Center is the principal educational-print, non-print and digitalmaterials repository of the school. The Library-IMC is designed to facilitate active and inquirybased learning, individual study and research and leisurely reading. It serves as an integral part of every learners' educational experience. Accessibility and adequacy in scope, quantity, timeliness and relevance are measures of quality.

The Laboratories include the Sciences Laboratories, Computer Laboratories and the Home Economics and Livelihood Education. They are venues that promote inquiry, discovery and research, and application of theories and principles covered in the different courses of study.

The laboratory provisions are adequate to meet DepEd requirements defined by the enrollment and programs offered by the school: space, number, appropriate and recent. The Laboratories are functional, well-kept and safe. There are evidences of systematic operations management and continuing improvement.

Description

Student Development Services assist in the growth and development of the school community. The Guidance and Counseling, Student Activity, Health and Nutrition Programs promote the social welfare and the total development of the learner. The Guidance and Counseling Program assists the learners in their personal and interpersonal relations through the admission services, guidance: orientation, individual inventory, testing and research, counseling, career guidance development and placement and follow-up services.

Basis of Evaluation

Guidance and Counseling includes orientation for learners to usher them to the school and its various programs and offerings, individual student inventory of personal and pertinent psychological information necessary for self-knowledge and self-development, testing and research efficient towards assessment and analyses of individual and institutional growth needs, individual and group counseling in the learners' effective understanding of the themselves,

developmental career guidance so learners may be introduced to various careers and placement and follow-up procedures to ensure instructional differentiation and learner assistance.

The Health and Nutrition Services provide for primary medical and dental procedures and proper nutrition essential for the well-being of the learners while they are in school.

The Student Activity Program includes co-curricular and extra - curricular activities that promote the holistic development of the learners, complement the academic program and pursue the PVMGO of the school. These activities must collectively develop learner initiative, responsibility and leadership as well as desirable social relationships.

Student Discipline covers matters on student decorum, behavior formation and disciplinary measures when called for. It is implemented by a Discipline Officer.

F. PHYSICAL PLANT AND INSTRUCTIONAL SUPPORT FACILITIES

Description

The physical plant comprises the educational environment covering land, building and building fixtures, learning and other ancillary spaces, providing for a conducive atmosphere. It is appropriate and adequate to attain the school vision-mission and program goals and objectives.

Basis of Evaluation

The physical environment supports robust teaching and promotes optimal learning and development. The physical plant facilities and buildings must conform with DepEd requirements and National Building Code requisites. It clearly provides for the needs of the size and scope of the school community while upholding their well-being such as health and nutrition, safety and security, sanitation and hygiene. The campus facilities are adequate for curricular and co-curricular activities. School buildings and classrooms are appropriate for educational purposes. Inspections to ensure health and safety code requirements are regularly conducted.

G. ADMINISTRATION AND GOVERNANCE

Description

Leadership and governance commits to the attainment of the school's philosophy vision, mission, goals, objectives and core values through its various programs and services. Its administrative organization (1) establishes policies, structures and processes to ensure effectiveness and efficiency of day-to-day operations and long-range planning, (2) implements resource management systems to strengthen operational stability and program sustainability, (3) fosters productive learning climate towards professional and learner development, and (4)cultivates collegial, collaborative and reflective relationships with its stakeholders and the wider community conducive for quality student learning.

Basis of Evaluation

The school's elementary Program must be duly recognized by the Department of Education. Its administrative organization is responsible for compliance with DepEd and other legislated requirements. Its governing policies and system mechanisms are defined in a published and well-disseminated Manual of Operations or Administrative Manual. Administrative leadership is manifest in the areas of operations management, human resource development, resource management and program sustainability. The school climate is characterized by positive culture and harmonious relationships among the members of the school community. There are collaborative structures which allow stakeholder participation in school management and decision-making.

H. SCHOOL BUDGET AND FINANCES

Description

Financial management involves budgeting, procurement, disbursement, accounting and auditing processes and procedures which follow prescribed principles and legislated requirements. The business practices of the school seek to manage its fiscal and material resources to attain its philosophy, vision, mission, program goals and objectives, scope and enrollment size.

Basis of Evaluation

The school operates on a school budget. Budget allocations for personnel, space, equipment and operations are appropriate and sufficient to sustain its programs and continued improvement plans. Budget control mechanisms are evidently established.

School finances are adequate to sustain effective and efficient delivery of programs and services. Income from tuition, fees and resource mobilization is appropriately spent for their intended purposes. There is evidence of financial stability to ensure the continued operations of the school and its developmentally appropriate programs and services in accordance with DepEd standards. The school maintains accurate records of financial transactions according to legal and ethical standards of accounting practice.

I. INSTITUTIONAL PLANNING AND DEVELOPMENT

Description

The school purposively lays down specific interventions for improvement of access, quality and governance with the help of the community and other stakeholders, through a systematic and continuous cycle of assessment, planning and implementation defined in a strategic three-year Standards – based School Improvement Plan (SSIP) and Annual Operational Plan. It assesses and communicates progress towards achieving the objectives for the continuing improvement of its educational programs and services which informs administrative decision-making.

Basis of Evaluation

The school is successful in meeting this standard when it implements a collaborative and ongoing process for improvement that aligns the school's philosophy, vision-mission, goals and objectives and curriculum goals with its size, function and community expectations for learner development and learning.

QUALITY INDICATORS/ STANDARDS FOR COMPLIAN	NCE	Encircle the number that reflects your school's level of practice of the quality indicator/standard of compliance.

Certification-Compliance Rules

The use of a Decision Rule based on ratings in Power and Support Standard items.

Area Rating is based on the following Decision Rule:

- 4 --- For a mode of 4 in the Power Standards and rating of at least 3 in the Support Standards
- 3 --- For a mode of 3 in the Power Standards and rating of at least 2 in the Support Standards
- 2 --- For a mode of 2 in the Power Standards
- 1 --- For a mode of 1 in the Power Standards
- 0 --- For a mode of 0 in Power Standards

Overall Rating based on a Decision Rule is as follows:

- 4 For a rating of 4 in all Core Areas and 3 or higher in Support Areas
- 3 For a rating of 3 in all Core Areas and 2 or higher in Support Areas
- 2 For a rating of 2 in all Core Areas and 2 or higher in the Support Areas
- 1 For a rating of 1 in all Core Areas and 1 or higher in the Support Areas
- 0 For a rating of 0 in all Core Areas

Appraisal of Blended/Distance Learning² (ABDL)

This form is to be used in schools where the K12 curriculum is as a matter of school policy and operations delivered in various modalities aside from the regular face-to-face classroom setting. In particular, this form covers schools where students have limited in-person contact with their teachers (i.e., once or twice a week) and are expected to do independent study or have online classes during the rest of the school week with the help of printed or online learning modules and resources. In such schools, the in-person class setting is *secondary* to other modes which involve either independent study or online classes.

The form may also be used by schools doing blended learning. The instrument contains items that deal with technology integration for both in-person and online teaching and learning. As a quality assurance document, the results of the appraisal may contribute to the school's plans to improve and upgrade its blended learning program. Hence, the objective of this appraisal is to provide different schools with helpful feedback on their current system of conducting instruction in modalities covering the combination of face-to-face, distance and online teaching.

The items in this appraisal form are drawn from various documents such as DepEd's guidelines for development of instructional materials for alternative delivery of instruction (ADM LR Standards 050820), learning continuity program (DO no. 12, s. 2020), and pertinent research on best practices for the use of printed modules, blended and distance learning. These items do not replace the regular Classroom Observation Form used in certification visits. These items then are additions and provide certifiers and observers with guidance on how to assess instruction in various modalities. It is also important to underscore here though that this form does not apply to the delivery of the Alternative Learning System (ALS) program.

The items are clustered in five domains namely, 1) Instructional Design; 2) Learner Engagement; 3) Assessment; 4) Technology Selection, Access and Support; and 5) Academic Integrity and Digital Citizenship. The rating scale in this form follows the same scale used in the Classroom Observation Form. Hence, the rating scale is established as:

² DepEd in its primer "Learning opportunities shall be available" provides the following definitions:

Blended Learning. This refers to a learning delivery that combines face-to-face with any or a mix of online distance learning, modular distance learning, and TV/ Radio-based Instruction. Blended learning will enable the schools to limit face-to-face learning, ensure social distancing, and decrease the volume of people outside the home at any given time.

Distance Learning. This refers to a learning delivery modality where learning takes place between the teacher and the learners who are geographically remote from each other during instruction. This modality has three types: Modular Distance Learning (MDL), Online Distance Learning (ODL), and TV/Radio-Based Instruction.

- 4 Performance of this item is innovatively done
- 3 Performance of this item is satisfactorily done
- 2 Performance of this item is partially done due to some omissions
- 1 Performance of this item is partially done due to serious errors and misconceptions
- 0 Performance of this item is not observed at all

NAME OF SCHOOL: Region: Address: Teacher: Subject of Instruction: Observer: Grade Level: Date of Observation:

DOMAIN 1: Instructional Design: The teacher prepares standards-based self-learning modules that show the following: An overview of the lesson, the learning 1. 4 3 2 1 0 objectives or targets and expected learning outcomes and outputs 2. Alignment of in-person and online activities, 4 3 2 1 0 assessments, learning resources, Website links, and other digital applications with K12 curriculum unit standards and learning competencies Employment of active learning, inquiry-based, 3 2 1 0 3. 4 learner-centered and problem-solving pedagogies in the different learning experiences and tasks A logical sequence beginning with acquisition 4 3 2 1 0 4. and understanding of content and culminating with transfer of learning to real-life situations 2 5. Varied graphic organizers, outlines, bullet 4 3 1 0 points, illustrations, charts, pictures, videos, real life examples, glossaries, and summaries to enable students to recall, process, and apply content

6.	Differentiated in-person and online practice exercises and questions that enable students to gain mastery of the specified learning standards and competencies	4	3	2	1	0
7.	A writing style that addresses the students in a conversational way and provides explicit and detailed procedures in accomplishing tasks and accessing resources	4	3	2	1	0
8.	Specific time allocations for accomplishing in- person and online learning tasks	4	3	2	1	0
9.	A weekly work plan or schedule of in-person and online sessions and their corresponding tasks and requirements for students to follow, do and submit	4	3	2	1	0
10.	Explanations of how different in-person and online learning tasks are connected to and build on each other and lead students to the attainment of the desired learning outcomes	4	3	2	1	0
	MAIN 2: Learner Engagement: The teacher facilit			_	-	in
lear	ning the curriculum unit standards and competence	ies throu	gh the f	following	:	
11.	A system of recording and monitoring the students' accomplishment of in-person and online learning tasks, requirements, and assignments	4	3	2	1	0
12.	Varied opportunities for students' interaction with learning material and resources, the subject teacher, classmates, community resources, and content experts	4	3	2	1	0
13.	Differentiated activities that address the learners' diverse backgrounds, interests, and multiple learning styles	4	3	2	1	0
14.	Learning activities that elicit critical thinking, creativity, reflection, dialogue, and collaboration	4	3	2	1	0

15. DOM	Implementation of specific procedures for students' participation in class recitation, check-up exercises, discussions, posts, and presentations in various modalities (e.g., routines on how to conduct one's self in synchronous and asynchronous sessions or blended models like station-rotation) MAIN 3: Assessment: The teacher assesses studen	4 ts' attair	3 mment o	2 f the cur	1 riculum u	0 unit
	dards and learning competencies through the follo					
16.	A system of obtaining, organizing and analyzing data on students' performance in various in-person and online activities and assessments	4	3	2	1	0
17.	Interactive learning exercises that enable students to practice specific competencies and self-assess and track their proficiency level	4	3	2	1	0
18.	Timely and regular feedback in various formats (e.g., use of platform or tools for comments, polls, surveys) to students regarding their performance	4	3	2	1	0
19.	Multiple methods and differentiated forms of assessment that diagnose students' readiness, check on students' understanding, allow students to revise and improve their work, and demonstrate in varied ways their attainment of the curriculum unit standards and learning competencies	4	3	2	1	0
20.	Mechanisms for students' consultation with teacher offline or in distance mode regarding content, procedures or requirements	4	3	2	1	0
acce	MAIN 4: Technology Selection, Access and Support ssible technology resources that support students' dards and competencies through the following:					
21.	A system of selection or curation of digital learning tools and resources aligned with	4	3	2	1	0

	curriculum unit standards and learning competencies					
22.	Varied media and digital resources in different formats or versions (e.g., text with video) for equitable access and ease of use by students	4	3	2	1	0
23.	Specific information on minimum technical requirements, detailed assistance on troubleshooting technical problems and means of obtaining technical support	4	3	2	1	0
24.	A system for recording and archiving discussions and presentations and retrieving learning materials and resources when needed (i.e., links to recordings of online meetings, transcripts, slide decks)	4	3	2	1	0
25.	Compliance with data privacy and confidentiality regulations and protection of learners from erroneous, offensive or harmful content	4	3	2	1	0
	MAIN 5: Academic Integrity and Digital Citizensl grity and the students' observance of standards of	-				
26.	Students' signed declaration that any submitted work or completed assessment done in-person and online is the product of their own efforts and understanding	4	3	2	1	0
27.	Students' compliance with standards of netiquette behavior and ethical use of digital media	4	3	2	1	0
28.	Implementation of school policies covering intellectual property and copyright, cybersecurity and cyberbullying	4	3	2	1	0
29.	Use of strategies and digital tools that verify the authenticity or originality of students' work	4	3	2	1	0

30.	Alignment of technology use and integration in	4	3	2	1	0
	teaching and learning with the school's					
	philosophy, vision, mission and core values
