MAKING DATA WORK FOR ME

ME WORKING FOR DATA

A group of approximately ten people are seated around a large, white, U-shaped conference table in a meeting room. They are engaged in a discussion, with some looking towards a woman on the left who appears to be speaking. The room has light-colored walls with decorative elements, including framed pictures and a floral garland. The floor is tiled, and there are several black office chairs. A yellow text box is overlaid on the bottom half of the image.

Making data work for us means that we have a **full picture of where our students are now or at any point in time.**

A man in a light blue hoodie is standing behind a table covered with large stacks of papers and books. Two women are standing to his right, looking at the materials. The woman closer to the man is wearing a dark vest over a patterned sweater, and the woman further right is wearing a green jacket. The room is cluttered with stacks of papers, books, and cardboard boxes. A Philippine flag is visible in the background.

**How is the performance of our SDO
and the schools at any given time?**

Press Release
December 13, 2023

Gatchalian: PH should learn from Baguio, CAR schools on boosting English proficiency

Schools across the country should learn the best practices of Baguio City and the Cordillera Administrative Region (CAR) when it comes to boosting learners' English proficiency, Senator Win Gatchalian said.

According to the 2023 English Proficiency Index by international education company EF Education First, Baguio City emerged as the top English-speaking and -listening city in the Philippines, garnering a score of 619. CAR, where Baguio is located, garnered a score of 616 and topped the English-speaking and -listening regions in the Philippines.

"Binabati ko ang ating mga mag-aaral at mga guro sa Baguio at CAR dahil sa naging magandang performance nila sa nagdaang international assessments. Marami tayong pwedeng matutunan sa kanila upang iangat ang performance ng mga mag-aaral sa iba't bang panig ng bansa pagdating sa English proficiency, pati na rin sa pagbabasa," said Gatchalian, Chairperson of the Senate Committee on Basic Education.

CAR is also among the top-performing regions in the 2022 round of the Programme for International Student Assessment (PISA). Alongside the National Capital Region (NCR) and Region 4A, CAR has one of the largest shares of students who have achieved the minimum proficiency in reading. The 2022 PISA results reveal that two out of five students in CAR achieved at least the minimum proficiency in reading.

Gatchalian emphasized that international assessments such as the 2023 English Proficiency Index and the latest round of PISA present opportunities to learn the best practices from top-performing regions. The lawmaker added that the best practices can be in the areas of collaboration between local government units and DepEd regions and divisions.

Moving forward, Gatchalian said that data from PISA will help the Second Congressional Commission on Education (EDCOM II) and the Senate Committee on Basic Education in proposing reforms to improve learners' performance and reverse the country's education crisis.

In 2018 and 2022, Baguio is a **Top Performing Division** in the PISA for the Philippines.

Baguio's score is **below average** in terms of OECD Average.

LEARNING OUTCOMES DASHBOARD

How the Learning Outcomes Data Is Collected and Processed

1 DATA ENTRY

Schools **encode** regularly and directly into a **standardized database**.

2 DATA CLEANING

Division IT team **checks for accuracy, completeness, and consistency**.

3 CLOUD UPLOAD

Validated data is **uploaded and stored securely in the cloud** for **real-time access**

4 DASHBOARD PROCESSING

Input the KPI

5 INSIGHTS & ACTIONS

The dashboard highlights patterns and **performance gaps through visual analytics**

What Bible story used data analytics?

“Noah didn’t just build an ark—he ran the ultimate predictive model.

- ✓ 40 days of rain forecast**
- ✓ 100% flood probability**
- ✓ Perfect resource optimization**

From SPREADSHEETS to DASHBOARDS

1

STRATEGIC MONITORING OF DISTRICTS AND SCHOOLS

Identifies gaps and strengths, guide in prioritizing schools

2

MORE TEACHER - STUDENT INTERACTION TIME

guide targeted interventions, teacher as a guide

3

GENERATE ACTIONABLE INSIGHTS AND ENSURE ACCOUNTABILITY

transparency, resource allocation and professional development

KEY LESSONS

1

Build your DASHBOARD

Identify what data is needed for decisions and actions

2

Get BUY – IN

Who will do what and when.

3

Make DATA your CENTERPIECE

Integrate in key meetings like:

- School Monitoring, Evaluation and Adjustment Meeting(MEA)
- District MEA, Division MEA
- Regional ManCom, Monthly DExeCom
- Program Implementation Review (PIR)
- Local School Board Meeting

4

Keep it SUSTAINED

Create systems that will facilitate data collection, processing, and sharing of practices such as a set Division policy and procedure, EdTech Forum and Events.

Challenges

Cultural Adoption

shift in mindset

Multiple Systems

*integration with existing
systems such as BEIS, LIS*

Data Collection and Accuracy

*incomplete and inaccurate data
affects dashboard reliability*

Challenges

Ways Forward

Cultural Adoption

shift in mindset

Data Literacy

*PD, AI information campaign,
pilot schools*

Multiple Systems

*integration with existing
systems such as BEIS, LIS*

Integration

*showcase Project FAITH to
RO/CO for integration*

Data Collection and Accuracy

*incomplete and inaccurate data
affects dashboard reliability*

Automate and Humanize

*utilization of Dashboard at the
school to the division level*

From division dashboards to school-wide and classroom-level initiatives, Baguio City schools are embracing data analytics to guide learning and interventions --- making data work for us. Join us.
