
PRIVATE FINANCING MECHANISM UNDER DUAL TRAINING SYSTEM IN THE PHILIPPINES (Dualtech Experience)

Key Challenges

- Technical Vocational Programs are not attractive to young people so there hardly come paying students, and being considered a last resort, those who come have no paying capacity.
- Technical Vocational Programs are in fact more expensive in actual cost (vouched by Toyota-Sweden) but perceived to be free by availers.

Key Challenges

- Private players cannot match free offerings by public providers.
- Regulatory innovations and interpretations pose further challenges.

Evolving Financing Mixes
